

Corporate Clinical Care Guidelines

Guideline:	Diabetes Care
Initial Approval Date:	November 2000
Revised/Approval Date:	March 2009
Status:	Revised
References/Sources:	American Diabetes Association ADA Clinical Care Guidelines 2009
Approved By:	QI/UM Committee

The guideline provides useful, general information. Whether the guideline should be employed as an aid in treating any specific patient is a matter best determined by the practitioner involved in the assessment of that patient's condition, taking into account all relevant aspects of that patient's medical history and condition.
