

Subject: Online Prior Authorization Tool

Unison Health Plan of Ohio is pleased to announce the availability of an online tool to assist providers in submitting prior authorization requests to the health plan. For providers who have a current account to access Unison's online provider portal, an additional option will be available to submit prior authorization requests online. The available options include the ability to submit requests for DME, inpatient services, home IV and infusion, and general outpatient and professional medical services.

For those providers not currently accessing the tools of Unison's online provider portal, please access the "Create an Account" feature under the Account Information link. Once an account is created, providers are given access to electronic eligibility checks, claims status inquiries, authorization status, and information on the status of appeals.

Unison Health Plan of Ohio's website can be accessed at www.unisonhealthplan.com by selecting Ohio on the main page pull down bar. We welcome and encourage all of our provider partners to access this exciting new feature and look forward to expanding our online services to you in the future!
